

## MATHEMATICS POLICY

**Date: March 2019**

**Signed:**

**Review: March 2020**

Children that have mathematical fluency are confidently able to apply their mathematical knowledge and skills both at school and in their daily lives.

## **1. Aims**

Maths teaching should contribute to the acquisition of life-long skills and promote enjoyment and enthusiasm for learning through practical activity, exploration and discussion.

Through our provision, we aim for children to:

- to apply their mathematical knowledge to solve problems, including those with real-life contexts, by choosing the appropriate operations
- estimate the approximate size of the answer to check the reasonableness of their calculations
- will leave primary school with an efficient, reliable, compact written method of calculation for each operation
- develop a range of mental calculations strategies, aided by informal jottings where necessary
- be confident in the fundamentals of maths and be able to reason mathematically
- understand the importance of mathematical skills in everyday life.

## **2. Objectives**

- To know and use numbers
- To add and subtract
- To multiply and divide
- To use fractions
- To understand the properties of shapes
- To describe position, direction and movement
- To use measures
- To use statistics
- To use algebra

(See *Milestones* attached)

## **3. Teaching and Learning**

- Staff at Hayton School have worked hard to understand the factors that lead to high standards in maths, and have developed a common approach to teaching maths throughout the school based on the following assumptions:
- The need to follow the agreed school curriculum, alongside the written calculation policy.
- The primacy of mental calculations, backed by accurate and rapid recall of number facts, is acknowledged.
- The importance of incorporating a range of teaching approaches, together with appropriate differentiation.

- Teachers use and expect pupils to use correct mathematical notation and vocabulary.
- The importance of the accelerated learning cycle:

Connecting the learning, the big picture for learning, expected outcomes, input, activating learning, demonstrating learning, review.

#### 4. Planning

Our medium-term mathematics plans give details of the main teaching objectives for each term.

Our short-term planning follows four key principles. They are:

- a dedicated maths lesson every day
- direct, instructive, inductive, applicable, exploratory and reflective teaching with the whole class and groups
- emphasis on mental calculation
- controlled differentiation with all pupils working on a common theme

#### The Lesson Structure

Lessons are generally based on the Power Maths Scheme of Work. White Rose Pre Tests are used to assess prior learning in order to ensure appropriate future planning. White Rose Post Tests are used to assess progression after the unit has been taught.

#### Structure of a Power Maths Lesson

- **Discover**  
Every lesson starts with a Discover task to get children to solve a problem that aims to generate curiosity. During the Discover section, children may use manipulatives to help them understand the Maths and explain their method.
- **Share**  
The next stage encourages children to share the methods they have tried to solve the problem in Discover.
- **Think Together**  
We only learn when we are thinking! In this section, Power Maths takes the approach 'I do, we do, you do' as children apply the knowledge they have just learned in a series of problems that continue to encourage thinking throughout.
- **Practise**  
Children are then ready for some independent practise.
- **Reflect**  
The final Reflect question helps the children evaluate whether they have understood the key concept and small step that they have been trying to master in the lesson.

Key Stage 1	Key Stage 2
<ul style="list-style-type: none"> <li>• Count and calculate in a range of practical contexts.</li> <li>• Use and apply mathematics in everyday activities and across the curriculum.</li> <li>• Repeat key concepts in many different practical ways to secure retention.</li> <li>• Explore numbers and place value up to at least 100.</li> <li>• Add and subtract using mental and formal written methods in practical contexts.</li> <li>• Multiply and divide using mental and formal written methods in practical contexts.</li> <li>• Explore the properties of shapes.</li> <li>• Use language to describe position, direction and movement.</li> <li>• Use and apply in practical contexts a range of measures, including time.</li> <li>• Handle data in practical contexts.</li> </ul>	<ul style="list-style-type: none"> <li>• Count and calculate in increasingly complex contexts, including those that cannot be experienced first-hand.</li> <li>• Rigorously apply mathematical knowledge across the curriculum, in particular in science, technology and computing.</li> <li>• Deepen conceptual understanding of mathematics by frequent repetition and extension of key concepts in a range of engaging and purposeful contexts.</li> <li>• Explore numbers and place value so as to read and understand the value of all numbers.</li> <li>• Add and subtract using efficient mental and formal written methods.</li> <li>• Multiply and divide using efficient mental and formal written methods.</li> <li>• Use the properties of shapes and angles in increasingly complex and practical contexts, including in construction and engineering contexts.</li> <li>• Describe position, direction and movement in increasingly precise ways.</li> <li>• Use and apply measures to increasingly complex contexts.</li> <li>• Gather, organise and interrogate data.</li> <li>• Understand the practical value of using algebra.</li> </ul>

## 5. Assessment and Recording

Assessment in maths is viewed as part of the assessment for learning cycle. Learning objectives and steps to success are shared with the children in every lesson. Children are provided with opportunities for self/peer-assessment and improvement. Marking is developmental and children are provided with next steps to extend their learning at least weekly. Teachers monitor the acquisition of skills, knowledge and understanding through appropriate teacher intervention, observations and discussions with groups and individuals, and records of achievement in the key skills in maths for each year group are updated termly. In addition to summative assessments we also use Chris Quigley's Depth of Learning to support formative assessment.

		<b>Milestone 1</b>	<b>Milestone 2</b>	<b>Milestone 3</b>
To know and use numbers	Counting	<ul style="list-style-type: none"> <li>Count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number.</li> <li>Count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens.</li> <li>Given a number, identify one more and one less.</li> <li>Count in steps of 2, 3, 5 and 10 from 0 or 1 and in tens from any number, forward and backward.</li> </ul>	<ul style="list-style-type: none"> <li>Count in multiples of 2 to 9, 25, 50, 100 and 1000.</li> <li>Find 1000 more or less than a given number.</li> <li>Count backwards through zero to include negative numbers.</li> </ul>	<ul style="list-style-type: none"> <li>Read numbers up to 10 000 000.</li> <li>Use negative numbers in context and calculate intervals across zero.</li> </ul>
	Representing	<ul style="list-style-type: none"> <li>Identify, represent and estimate numbers using different representations, including the number line.</li> <li>Read and write numbers initially from 1 to 20 and then to at least 100 in numerals and in words.</li> </ul>	<ul style="list-style-type: none"> <li>Identify, represent and estimate numbers using different representations.</li> <li>Read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.</li> </ul>	<ul style="list-style-type: none"> <li>Write numbers up to 10 000 000</li> <li>Read Roman numerals to 1000 (M) and recognise years written in Roman numerals.</li> </ul>
	Comparing	<ul style="list-style-type: none"> <li>Use the language of: equal to, more than, less than (fewer), most and least.</li> <li>Compare and order numbers from 0 up to 100; use &lt;, &gt; and = signs.</li> </ul>	<ul style="list-style-type: none"> <li>Order and compare numbers beyond 1000.</li> </ul>	<ul style="list-style-type: none"> <li>Order and compare numbers up to 10 000 000.</li> </ul>
	Place value	<ul style="list-style-type: none"> <li>Recognise the place value of each digit in a two-digit number (tens, ones).</li> </ul>	<ul style="list-style-type: none"> <li>Recognise the place value of each digit in a four-digit number. (thousands, hundreds, tens, and ones)</li> <li>Round any number to the nearest 10, 100 or 1000.</li> </ul>	<ul style="list-style-type: none"> <li>Round any whole number to a required degree of accuracy.</li> <li>Determine the value of each digit in any number.</li> </ul>
	Solving problems	<ul style="list-style-type: none"> <li>Use place value and number facts to solve problems.</li> </ul>	<ul style="list-style-type: none"> <li>Solve number and practical problems with increasingly large positive numbers.</li> </ul>	<ul style="list-style-type: none"> <li>Solve number and practical problems.</li> </ul>

To add and subtract	Complexity	<ul style="list-style-type: none"> <li>• Solve one-step problems with addition and subtraction: <ul style="list-style-type: none"> <li>• Using concrete objects and pictorial representations including those involving numbers, quantities and measures.</li> <li>• Using the addition (+), subtraction (-) and equals (=) signs.</li> <li>• Applying their increasing knowledge of mental and written methods.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Solve two-step addition and subtraction problems in contexts, deciding which operations and methods to use and why.</li> </ul>	<ul style="list-style-type: none"> <li>• Solve multi-step addition and subtraction problems in contexts, deciding which operations and methods to use and why.</li> </ul>
	Methods	<ul style="list-style-type: none"> <li>• Add and subtract numbers using concrete objects, pictorial representations, and mentally, including: <ul style="list-style-type: none"> <li>• One-digit and two-digit numbers to 20, including zero.</li> <li>• A two-digit number and ones.</li> <li>• A two-digit number and tens.</li> <li>• Two two-digit numbers.</li> <li>• Adding three one-digit numbers.</li> <li>• Show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate.</li> <li>• Add and subtract numbers mentally, including: <ul style="list-style-type: none"> <li>• A three-digit number and ones.</li> <li>• A three-digit number and tens.</li> <li>• A three-digit number and hundreds.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Add and subtract whole numbers with more than 4 digits, including using formal written methods. (columnar addition and subtraction)</li> <li>• Add and subtract numbers mentally with increasingly large numbers.</li> </ul>
	Checking	<ul style="list-style-type: none"> <li>• Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.</li> </ul>	<ul style="list-style-type: none"> <li>• Estimate and use inverse operations to check answers to a calculation.</li> </ul>	<ul style="list-style-type: none"> <li>• Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy.</li> </ul>
	Using number facts	<ul style="list-style-type: none"> <li>• Represent and use number bonds and related subtraction facts within 20.</li> <li>• Recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100.</li> </ul>	<ul style="list-style-type: none"> <li>• Solve problems, including missing number problems, using number facts, place value and more complex addition and subtraction.</li> </ul>	<ul style="list-style-type: none"> <li>• Add and subtract negative integers.</li> </ul>

To multiply and divide	Complexity	<ul style="list-style-type: none"> <li>Solve one-step problems involving multiplication and division by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher.</li> </ul>	<ul style="list-style-type: none"> <li>Solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems (such as n objects are connected to m objects).</li> </ul>	<ul style="list-style-type: none"> <li>Solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign.</li> <li>Solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates.</li> <li>Use knowledge of the order of operations to carry out calculations involving the four operations.</li> </ul>
	Methods	<ul style="list-style-type: none"> <li>Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (<math>\cdot</math>), division (<math>\div</math>) and equals (<math>=</math>) signs.</li> <li>Show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot.</li> <li>Solve problems involving multiplication and division using mental methods.</li> </ul>	<ul style="list-style-type: none"> <li>Multiply two-digit and three-digit numbers by a one-digit number using formal written layout.</li> <li>Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers.</li> <li>Recognise and use factor pairs and commutativity in mental calculations.</li> </ul>	<ul style="list-style-type: none"> <li>Multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication.</li> <li>Divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context.</li> <li>Divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context.</li> <li>Perform mental calculations, including with mixed operations and large numbers.</li> </ul>
	Checking	<ul style="list-style-type: none"> <li>Use known multiplication facts to check the accuracy of calculations.</li> </ul>	<ul style="list-style-type: none"> <li>Recognise and use the inverse relationship between multiplication and division and use this to check calculations and solve missing number problems.</li> </ul>	<ul style="list-style-type: none"> <li>Estimate and use inverse operations and rounding to check answers to a calculation.</li> </ul>
	Using multiplication and division facts	<ul style="list-style-type: none"> <li>Recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables.</li> <li>Recognise odd and even numbers.</li> </ul>	<ul style="list-style-type: none"> <li>Recall multiplication and division facts for multiplication tables up to <math>12 \times 12</math>.</li> </ul>	<ul style="list-style-type: none"> <li>Identify common factors, common multiples and prime numbers.</li> <li>Establish whether a number up to 100 is prime and recall prime numbers up to 19.</li> </ul>

		<ul style="list-style-type: none"> <li>• Use multiplication and division facts to solve problems.</li> </ul>		<ul style="list-style-type: none"> <li>• Multiply and divide whole numbers and those involving decimals by 10, 100 and 1000.</li> <li>• Recognise and use square numbers and cube numbers, and the notation for squared (2) and cubed (3).</li> <li>• Solve problems involving multiplication and division including using knowledge of factors and multiples, squares and cubes.</li> </ul>
--	--	--------------------------------------------------------------------------------------------------------------	--	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Fractions (including decimals, percentages, ratio and proportion)	Recognising fractions	<ul style="list-style-type: none"> <li>• Recognise, find and name a half as one of two equal parts of an object, shape or quantity.</li> <li>• Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity.</li> <li>• Recognise, find, name and write fractions <math>\frac{1}{2}</math>, <math>\frac{1}{4}</math>, <math>\frac{2}{4}</math> and <math>\frac{3}{4}</math> of a length, shape, set of objects or quantity.</li> </ul>	<ul style="list-style-type: none"> <li>• Recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators.</li> <li>• Recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators.</li> <li>• Round decimals with one decimal place to the nearest whole number.</li> <li>• Compare numbers with the same number of decimal places up to two decimal places.</li> <li>• Count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10.</li> <li>• Count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten.</li> <li>• Compare and order unit fractions and fractions with the same denominators.</li> </ul>	<ul style="list-style-type: none"> <li>• Compare and order fractions whose denominators are all multiples of the same number.</li> <li>• Compare and order fractions, including fractions <math>&gt; 1</math>.</li> <li>• Recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements <math>&gt; 1</math> as a mixed number.</li> <li>• Round decimals with two decimal places to the nearest whole number and to one decimal place.</li> <li>• Read, write, order and compare numbers with up to three decimal places.</li> <li>• Identify the value of each digit in numbers given to three decimal places.</li> <li>• Solve problems involving number up to three decimal places.</li> <li>• Recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal.</li> </ul>
	Equivalence	<ul style="list-style-type: none"> <li>• Recognise the equivalence of <math>\frac{2}{4}</math> and <math>\frac{1}{2}</math>.</li> </ul>	<ul style="list-style-type: none"> <li>• Recognise and show, using diagrams, families of common equivalent fractions.</li> <li>• Recognise and write decimal equivalents of any number of tenths or hundredths.</li> </ul>	<ul style="list-style-type: none"> <li>• Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths.</li> </ul>

			<ul style="list-style-type: none"> <li>• Recognise and write decimal equivalents to <math>\frac{1}{4}</math>, <math>\frac{1}{2}</math>, <math>\frac{3}{4}</math>.</li> </ul>	<ul style="list-style-type: none"> <li>• Read and write decimal numbers as fractions.</li> <li>• Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents.</li> <li>• Use common factors to simplify fractions; use common multiples to express fractions in the same denomination.</li> <li>• Associate a fraction with division and calculate decimal fraction equivalents.</li> <li>• Recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.</li> </ul>
Solving problems	<ul style="list-style-type: none"> <li>• Write simple fractions for example, <math>\frac{1}{2}</math> of <math>6 = 3</math>.</li> </ul>	<ul style="list-style-type: none"> <li>• Add and subtract fractions with the same denominator within one whole.</li> <li>• Solve problems involving increasingly harder fractions.</li> <li>• Calculate quantities and fractions to divide quantities (including non-unit fractions where the answer is a whole number).</li> <li>• Add and subtract fractions with the same denominator.</li> <li>• Find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths.</li> <li>• Solve simple measure and money problems involving fractions and decimals to two decimal places.</li> </ul>	<ul style="list-style-type: none"> <li>• Add and subtract fractions with the same denominator and denominators that are multiples of the same number.</li> <li>• Add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions.</li> <li>• Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams.</li> <li>• Multiply simple pairs of proper fractions, writing the answer in its simplest form.</li> <li>• Solve problems which require knowing percentage and decimal equivalents of, <math>\frac{1}{2}</math>, <math>\frac{1}{4}</math>, <math>\frac{1}{5}</math>, <math>\frac{2}{5}</math>, <math>\frac{4}{5}</math> and those fractions with a denominator of a multiple of 10 or 25.</li> <li>• Divide proper fractions by whole numbers.</li> <li>• Multiply and divide numbers by 10, 100 and 1000 giving answers up to three decimal places.</li> </ul> <p><b>Ratio and proportion</b></p> <ul style="list-style-type: none"> <li>• Solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts.</li> </ul>	

				<ul style="list-style-type: none"> <li>• Solve problems involving the calculation of percentages and the use of percentages for comparison.</li> <li>• Solve problems involving similar shapes where the scale factor is known or can be found.</li> <li>• Solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.</li> </ul>
--	--	--	--	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

To understand the properties of shapes	<ul style="list-style-type: none"> <li>• Recognise and name common 2D and 3D shapes.</li> <li>• Identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line.</li> <li>• Identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces.</li> <li>• Identify 2-D shapes on the surface of 3-D shapes.</li> <li>• Compare and sort common 2-D and 3-D shapes and everyday objects.</li> </ul>	<ul style="list-style-type: none"> <li>• Draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them.</li> <li>• Recognise angles as a property of shape or a description of a turn.</li> <li>• Identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle.</li> <li>• Identify horizontal and vertical lines and pairs of perpendicular and parallel lines.</li> <li>• Compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes.</li> <li>• Identify acute and obtuse angles and compare and order angles up to two right angles by size.</li> <li>• Identify lines of symmetry in 2-D shapes presented in different orientations.</li> <li>• Complete a simple symmetric figure with respect to a specific line of symmetry.</li> </ul>	<ul style="list-style-type: none"> <li>• Identify 3-D shapes, including cubes and other cuboids, from 2-D representations.</li> <li>• Know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles.</li> <li>• Draw given angles, and measure them in degrees (<math>^{\circ}</math>).</li> <li>• Identify:</li> <li>• Angles at a point and one whole turn (total <math>360^{\circ}</math>).</li> <li>• Angles at a point on a straight line and a turn (total <math>180^{\circ}</math>).</li> <li>• Other multiples of <math>90^{\circ}</math>.</li> <li>• Use the properties of rectangles to deduce related facts and find missing lengths and angles.</li> <li>• Distinguish between regular and irregular polygons based on reasoning about equal sides and angles.</li> <li>• Draw 2-D shapes using given dimensions and angles.</li> <li>• Recognise, describe and build simple 3-D shapes, including making nets.</li> <li>• Compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons.</li> </ul>
----------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

				<ul style="list-style-type: none"> <li>• Illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius.</li> <li>• Recognise angles where they meet at a point, are on a straight line, or are vertically opposite and find missing angles.</li> </ul>
--	--	--	--	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

To describe position, direction and movement	<ul style="list-style-type: none"> <li>• Describe position, direction and movement, including whole, half, quarter and three-quarter turns.</li> <li>• Order and arrange combinations of mathematical objects in patterns and sequences.</li> <li>• Use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise).</li> </ul>	<ul style="list-style-type: none"> <li>• Recognise angles as a property of shape and as an amount of rotation.</li> <li>• Identify right angles, recognise that 2 right angles make a half turn and 4 make a whole turn.</li> <li>• Identify angles that are greater than a right angle.</li> <li>• Describe positions on a 2-D grid as coordinates in the first quadrant.</li> <li>• Describe movements between positions as translations of a given unit to the left/right and up/down.</li> <li>• Plot specified points and draw sides to complete a given polygon.</li> </ul>	<ul style="list-style-type: none"> <li>• Identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.</li> <li>• Describe positions on the full coordinate grid. (all four quadrants)</li> <li>• Draw and translate simple shapes on the coordinate plane, and reflect them in the axes.</li> </ul>
----------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

To use measures	<ul style="list-style-type: none"> <li>• Compare, describe and solve practical problems for: <ul style="list-style-type: none"> <li>• lengths and heights.</li> <li>• mass/weight.</li> <li>• capacity and volume.</li> <li>• time.</li> </ul> </li> <li>• Measure and begin to record: <ul style="list-style-type: none"> <li>• lengths and heights.</li> <li>• mass/weight.</li> <li>• capacity and volume.</li> <li>• time. (hours, minutes, seconds).</li> </ul> </li> <li>• Recognise and know the value of different denominations of coins and notes.</li> </ul>	<ul style="list-style-type: none"> <li>• Measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml).</li> <li>• Measure the perimeter of simple 2-D shapes.</li> <li>• Add and subtract amounts of money to give change. (£ and p)</li> <li>• Tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks.</li> <li>• Estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes and hours; use appropriate vocabulary.</li> </ul>	<ul style="list-style-type: none"> <li>• Convert between different units of metric measure.</li> <li>• Understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints.</li> <li>• Measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres.</li> <li>• Calculate and compare the area of rectangles (including squares), and including using standard units, square centimetres (cm<sup>2</sup>) and square metres (m<sup>2</sup>) and estimate the area of irregular shapes.</li> </ul>

To use algebra		<ul style="list-style-type: none"> <li>• Solve addition and subtraction problems involving missing numbers.</li> </ul>	<ul style="list-style-type: none"> <li>• Solve addition and subtraction, multiplication and division problems that involve missing numbers.</li> </ul>	<ul style="list-style-type: none"> <li>• Use simple formulae.</li> <li>• Generate and describe linear number sequences.</li> <li>• Express missing number problems algebraically.</li> <li>• Find pairs of numbers that satisfy an equation with two unknowns.</li> <li>• Enumerate possibilities of combinations of two variables.</li> </ul>
		<ul style="list-style-type: none"> <li>• Solve addition and subtraction problems involving missing numbers.</li> </ul>	<ul style="list-style-type: none"> <li>• Solve addition and subtraction, multiplication and division problems that involve missing numbers.</li> </ul>	<ul style="list-style-type: none"> <li>• Use simple formulae.</li> <li>• Generate and describe linear number sequences.</li> <li>• Express missing number problems algebraically.</li> <li>• Find pairs of numbers that satisfy an equation with two unknowns.</li> <li>• Enumerate possibilities of combinations of two variables.</li> </ul>

## **6. Inclusion**

The maths policy firmly supports the equal opportunities philosophies of the school and all children will have access to the maths curriculum. Where necessary, adaptations will be made to the curriculum, to equipment and to resources to allow access to maths for pupils with SEN, including provision for pupils that are exceptionally able in mathematics.

## **7. Resources**

We encourage children to learn by experience and value the importance of using and applying knowledge to practical mathematical experiences in everyday life.

## **8. Health and Safety**

In order to access and benefit from the mathematics curriculum, pupils must feel safe within the classroom and around school. This can be monitored through all staff following health and safety procedures of the school.

When organising and undertaking trips outside of the school grounds, risk assessments are undertaken, pre-visits are made and first aid kits alongside pupils emergency contact details and medical information are carried at all times.

## **9. Extra-Curricular Activities**

In accordance with year expectations for mathematics, school trips are undertaken to encourage the pupils' curiosity, investigative and questioning skills as well as allowing the pupils' to learn in a different setting. These include transitional opportunities for preparing children for secondary school. Speakers from local business, film makers and theatre groups are also invited into school to boost the pupils learning and enthusiasm for the subject.

Parents and children are encouraged to research and further learning outside of school through tasks sent home from school or through day trips undertaken as a family.

## **10. Staff Development**

The Head and mathematics subject leader will oversee the daily running of the school system, and further develop the expertise of all staff through training sessions and classroom support. The Head and the mathematics subject leader will assess and address staff training needs as part of the annual development plan process or in response to individual needs and requests throughout the year. Individual teachers should attempt to continually develop their own skills and knowledge, identify their own needs and notify the mathematics subject leader of attendance at courses etc.
